

Installation Instructions

1. Installing the Adobe AIR package: If Adobe AIR is not installed on your machine you will be asked to install it first. Clicking the image will take care of AIR installation.
2. Installing SDM-Assist: After step 1 (or if AIR is already installed), SDM-Assist will be installed. You will be prompted to "Open" or "Save" the file. Select "Open" to proceed with installation.
3. In the options screen, you will be asked if you want to create a desktop icon. Please check this box so that the application icon is available on the desktop.
4. Uninstalling SDM-Assist: To uninstall from Windows, Go to Control Panel>Uninstall Program and select SDM-Assist. Click 'Uninstall'/'Remove' to remove the application. Note: If you get an Error #2032, try clearing the History cache and cookies on the browser. Alternately try using another browser (application not new window) to install the SDM-Assist.
